

## **Ensure Technologies and Section 508 of the Rehabilitation Act**

XyLoc is a simplified sign on and full-time information security tool that meets the criteria set forth in the Section 508 standards of the Federal Rehabilitation Act.

XyLoc's features satisfy the applicable accessibility standards of the Architectural and Transportation Barriers Compliance Board set out in 36 C.F.R. Part 1194 (the "Accessibility Standards").

XyLoc simplifies access to the computer and was designed to make the computer more easily accessible by people with handicaps. XyLoc eliminates the need for keystrokes and limits the need for physical interaction with the computer. XyLoc's features support accessibility. XyLoc's "hands-free" nature is the principal accessibility feature of the product.

XyLoc works with Microsoft operating systems Windows 2000 and XP, XP Embedded Thin Clients, and all tools designed to meet Section 508 requirements.
